Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:
 - a.) The status of the parent application needs to be updated on page 1 of the specification.Appropriate correction is required.

Claim Rejections - 35 U.S.C. § 112

2. Claims 19-20 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

New claims 19-20 are not supported by the originally filed specification. The specification and drawings disclose a support member wherein a capillary tube is situated on one side of the support member. A spreading layer and a reagent layer are situated on a side of the support member opposite of the capillary tube. There is no disclosure of just a "support member with a capillary" as recited in new claim 19. This language is broader than what is disclosed in the specification or shown in the drawings. This language only requires a support member with a capillary where the capillary could be anywhere on the support member such as on the same side of the support member as the spreading and reagent layers. While Applicants assert that support

for new claims 19-20 can be found in original claims 13-18, no such support can be found in originally filed claims 13-18 or originally filed claims 1-12. All of the originally filed claims require the capillary tube to be on one side of the support member and the spreading, reagent, and carrier layers on the opposite side of the support member. There is no support for any other orientation of the capillary tube on the support member.

3. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is vague. In line 4, the recitation of "the first side" lacks antecedent support.

Claim 2 is vague. In line 4, the recitation of "the indication" lacks antecedent support.

Claim 11 is vague. In line 5, the recitation of "the first side" lacks antecedent support.

The last line of the claim is vague. The recitation of "the indication" lacks antecedent support. Also, the claim is incomplete because there is no step that correlates the "the indication" to the presence of analyte.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible

Art Unit: 1641

harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 5,948,695. Although the conflicting claims are not identical, they are not patentably distinct from each other because patent '695 claims a device and method of assay using the device with the same limitations as the instantly claimed device and method of assay.

Allowable Subject Matter

6. Claims 13-18 are allowed.
